OBJECTIVE

Python Full Stack Developer with 1.8+ years of experience developing web applications using Python, Django, Django REST Framework, Angular, Ionic, JavaScript, and MySQL. Experienced in REST API development, database design, business logic implementation, and frontend-backend integration. Hands-on experience in cross-platform mobile application development, Android and iOS build generation, and application publishing on the Google Play Store and Apple App Store. Familiar with Docker, basic AWS, server configuration, and application deployment.

EDUCATION

Master of Computer Application, Manonmaniam Sundaranar University — 2022 – 2024
Percentage: **73**%

Bachelor of Computer Science, Manonmaniam Sundaranar University — 2018 – 2021
Percentage: **73** %

HSC, Geetha Matric Higher Secondary School, Tuticorin — 2017 – 2018
Percentage: **68**%

SSLC, Star Matric Higher Secondary School, Tuticorin — 2015 – 2016
Percentage: **93.6**%

TECHNICAL SKILLS

Programming	**Python**
Backend	**Django, Django REST Framework, REST APIs, Django ORM ,FastAPI**
Frontend	**Angular,Ionic, HTML, CSS, JavaScript**
Mobile Development	**Ionic with Angular, Android Build , iOS Build , Android Studio, Xcode**
App Deployment	**Google Play Store Publishing, Apple App Store Publishing**
DevOps	**Docker, GitHub, Basic AWS, FireWall, DNS Configuration, Server Deployment**
Other	**JSON, API Integration, CRUD, Authentication, Debugging**

SOFT SKILLS

Active and quick learner, Time Management, Problem Solving, Decision Making

PROJECTS

COMPANY : POSTULATE INFO TECH — Dec 2024 – June 2025

DESIGNATION : PYTHON FULL STACK DEVELOPER

- **PROJECT : Siyyon Parvat**
  Description: Siyyon Parvat is a full-dynamic land and property buy/sell system designed to manage real estate transactions through associations. The platform allows users to purchase or sell land, homes, and properties with structured workflows, dynamic forms, and real-time data management for daily business operations.

  Front-End: Angular, Ionic, HTML, CSS, JavaScript
  Back-End: Python Django
  Database: MySql
  Others: Aws Lightsail, S3

- Developed a dynamic land and property buy/sell management system
- Implemented association-based workflows and real-time data handling

- Built REST APIs and integrated frontend with backend services
- Designed database models and optimized queries for performance

---

COMPANY : POSTULATE INFO TECH June 2025 – June 2026

DESIGNATION : PYTHON FULL STACK DEVELOPER

- **PROJECT : MstarSettlement**
  Description:Developed a dynamic investment management system where multiple investors contribute varying amounts, and properties are allocated based on association-driven business rules. The system calculates investor eligibility, proportional ownership, and fair property distribution using configurable allotment logic..

  Front-End: Angular, HTML, CSS, JavaScript
  Back-End: Python FastAPI
  Database: MySql

- Designed and implemented investment-to-property distribution logic for multiple investors.
- Implemented OTP-based mobile number verification to enhance user authentication and improve application security.
- Developed algorithms to aggregate investments association-wise and calculate eligible property share.
- Implemented rule-based allotment strategies (receipt-based, family-based, association-based).
- Integrated frontend forms for investor enrollment, receipt tracking, and allotment visualization.

COMPANY : POSTULATE INFO TECH June 2026 – Current

DESIGNATION : PYTHON FULL STACK DEVELOPER

- **PROJECT : Postulate LMS**
  Description: Developed and maintained a Learning Management System to manage student enquiries, admission processes, and student-related administrative activities through web and mobile applications.

  Front-End: Angular, Ionic, HTML, CSS, JavaScript
  Back-End: Python Django
  Database: MySql

- Developed and maintained LMS modules covering the complete student lifecycle from enquiry and admission to course completion and certificate issuance.
- Implemented enquiry management workflows to capture prospective student details, follow-ups, and admission conversions.
- Developed admission and student management modules for maintaining student profiles, course details, batch allocation, and academic information.
- Developed and integrated mobile application features using Ionic Angular.
- Generated Android application builds using Android Studio and iOS application builds using Xcode.
- Worked on mobile application build preparation and release deployment for Android and iOS platforms.
- Published the Postulate App on the Google Play Store and Apple App Store

INTERSHIP

Front-End Developer Intern May 2024 – July 2024
Hysus Technologies, Tuticorin

- Contributed to the development of an internal project using HTML, CSS, JavaScript, React.js, and Next.js.
- Collaborated with a team to design and implement user interfaces, enhancing user experience.
- Integrated Firebase for authentication and Apollo Client for data fetching, improving application performance.
- Worked with GitLab for version control, managing code conflicts, and ensuring smooth delivery.

CERTIFICATION

Front-End Developer Internship Certificate — Hysus Technologies
Duration: 3 Months (May 2024 – Aug 2024)

LANGUAGES

Tamil — Full Bilingual Proficiency
English — Limited Working Proficiency
